CATALOGUE 2023/24

Innovative leisure products for camping, caravans and motorhomes.

ABOUT VADAC

PIONEERING SUSTAINABLE CARAVANING FOR THE FUTURE

At VADAC, our love for nature aligns perfectly with camping enthusiasts. Our mission? Combine the joys of camping with a commitment to the environment. With over 25 years in the industry, we're on a mission to redefine the caravanning experience.

Since our foundation in 1997, VADAC has consistently pioneered innovative accessories for caravans, campers and boats. Our "different mindset" ethos drives us, leading to fresh and impactful perspectives within the caravanning and marine industry. Our ultimate ambition? Ensure caravanning is both comfortable and sustainable.

In 2018, our blueprint for a greener caravanning future took shape. Central to this vision is transitioning from gas heaters to efficient heat pumps. Our Coolmach heat pump, currently under development, promises to revolutionize the industry, steering caravanning towards an eco-friendly future.

The year 2023 is special for us, it marks the introduction of SANYMO, our innovative water system line. The range includes cutting-edge water heaters, water pumps, water purifiers and quick-connect water system parts.

Our main focus has become the OEM market now, aiming to be the first choice for caravan and camper makers. We envision future caravans being outfitted with VADAC's advanced components, underscoring our unmatched quality and innovation. Collaboration with leading distributors and retailers remains and is expanding, ensuring our products reach a wide audience.

With a foundation built on innovation, reliability and dedication, we're focused on contributing to a sustainable caravanning future. Today, as we set out to redefine eco-friendly caravanning, we're committed to helping caravan enthusiasts resonate with nature responsibly. With our upcoming heat pump and partnerships with top caravan makers, we're excited about what's next.

Embark on a journey with VADAC towards a greener tomorrow, where every caravan trip underscores our enduring commitment to the planet.

LIST OF CONTENT

01

WATER HEATERS

The all-in-one solution for hot water in the caravan or motorhome. Stainless steel tank with an insulating EPP housing. Available in 12V, 230V and as a combi.

02

SUBMERSIBLE PUMPS

The SANYMO submersible pumps top models have a unique dry-running protection that automatically shuts off the pump when the tank is empty, preventing it from overheating.

03

PRESSURE PUMPS

Pressure pumps for caravan and motorhome, PP-12 with 2.4 bar suitable for pressure resistant boilers. PP-10 with 1.2 bar suitable for pressureless boilers.

04

PRESSURE PUMP SYSTEM

The SANYMO XP pressure pump system makes it possible to enjoy the same level of comfort in your RV as the water system at home.

05

SANYMO3

The SANYMO water purification system produces ozone gas. The ozone gas ensures that the water in the fresh water tank and the entire water system always remains free of bacteria and biofilm.

06

SANYMO AQUASNAP

Introducing our state-of-the-art SANYMO AquaSnap water system building kit, designed with a quick connect feature. Up to 10 bar and 90 degrees Celsius.

07

WATER SYSTEM PARTS

Full range of water system products to improve the quality of the water system in the caravan and motorhome.

08

REPLACEMENT

Replacement products to improve the quality of daily used products in the caravan and motorhome.

09

MISCELLANEOUS

Accessories for caravans and motorhomes. Suitable for every camping enthusiast and designed to improve everyday comfort.

10

LITHIUM BATTERIES

The new range of PowerAce (LiFePO4) lithium smart batteries. All models are included with BMS and bluetooth. Lightweight batteries, long life and easy to use.

WATER HEATERS

Water heaters

Our high-quality water heaters, designed for caravans and motorhomes, offer advanced heating in 12V, 230V, and combi options, all at surprisingly affordable prices.

Introducing our new range of water heaters, designed to elevate the comfort of caravan, RV and boat.

With a sleek design, these heaters not only heat water swiftly but also ensure prolonged warmth thanks to their advanced insulation.

Choose from three versatile sizes: the 3L version, a unique combi equipped with both 12VDC 200W and 230VAC 300W heating elements; the 6L with a 230VAC 300W element; and the 10L with a powerful 230VAC 600W element.

Combi versions for the larger sizes are on the horizon. Encased in a durable stainless steel tank that meets European drinking water regulations, each unit boasts precise heating and maximum safety.

For ease of use, every water heater includes a wall-mountable control panel, signaling its state with a control light, and comes complete with drain taps, hose clamps, mounting materials and a multi-language manual.

Experience the difference: state-of-the-art water heaters offering unprecedented value for money.

- ▶ Stainless steel tank with insulating EPP housing
- ▶ Overtemperature protection: 75°C
- ▶ Pump pressure: max. 3.5 bar
- ▶ Temperature limit: 70°C
- ▶ Drinking water safe

3L COMBI

SUBMERSIBLE PUMPS

Never again a broken submersible pump due to dry running !

The SANYMO submersible pumps are characterized by their long life and high quality. The lifespan is longer by using high-quality materials and high-tech production techniques. All pumps are equipped with integrated venting to prevent splashing taps.

The top models in the range feature a unique dry-running protection that automatically shuts off the pump when the tank is empty, preventing it from overheating. When the water level in the tank falls below 20 mm, the pump will switch off automatically after 30 seconds.

SP-12

- ▶ 0.8 bar - 12 liter per minute
- ▶ Service life of more than 500 hours

SP-15

- ▶ 1.0 bar - 15 liter per minute
- ▶ Service life of more than 500 hours

SP-18

- ▶ 1.2 bar - 18 liter per minute
- ▶ Integrated check valve
- ▶ Service life of more than 500 hours
- ▶ With dry running protection

SP-21

- ▶ 1.8 bar - 21 liter per minute
- ▶ Integrated check valve
- ▶ Service life of more than 500 hours
- ▶ With dry running protection

PRESSURE PUMPS

Long service life and high reliability

The service life of the SANYMO pressure pump is many times longer than that of a submersible pump. Thanks to the pressure pump, the failure-sensitive switch in the tap is also superfluous.

Choice of connector

The pressure pumps from Sanymo can be delivered with a connector of choice. A quick connector suitable for a water hose with outer diameter 12mm or a hose tulle suitable for a water hose with inner diameter 10mm or 12mm.

How much comfort do you opt for?

The SANYMO pressure pumps are available in two versions.

The PP-12 is the ultimate solution with a water pressure of 2.4 Bar and a capacity of 12 liters per minute.

For this it's necessary that your RV is equipped with a boiler that can withstand a higher water pressure.

Do you still have a pressureless boiler?

Then there is the PP-10 with a water pressure of 1.2 Bar and a capacity of 10 liters per minute.

Technical specifications

- Choice of connector; quick connector or pipe tulle
- Mounting and connecting is easy and quick
- Long service life and high reliability
- Available as low and high pressure pump

Model	PP-10	PP-12
Capacity	10 l/min	12 l/min
Water pressure	1,2 Bar	2,4 Bar

PRESSURE PUMP SYSTEMS

Water in your RV with the comfort from home

You open the tap, at first no water comes out, you hear a pump running and then a jerky jet of water comes out. This is a well-known phenomenon for RV owners. The SANYMO XP pressure pump system solves this problem and makes it possible to enjoy the same level of comfort in your RV as the water system at home. Because there is pressure on the water system, the water comes out of the tap straight away and thanks to the built-in expansion tank, the water comes out with a smooth constant jet.

Long service life and high reliability

The service life of the SANYMO XP pressure pump system is many times longer than that of a submersible pump. Thanks to the pressure pump system, the failure-sensitive switch in the tap is also superfluous.

User-friendly all-in-one solution

The innovative SANYMO XP pressure pump system consists of a high-quality pressure pump, an expansion tank and a water filter. The components are conveniently integrated in one compact housing with easily accessible connections. Mounting and connecting is simple and quick.

How much comfort do you opt for?

The SANYMO XP pressure pump system is available in two versions. The XP-12 is the ultimate solution with a water pressure of 2.4 Bar and a capacity of 12 liters per minute. For this it is necessary that your RV is equipped with a boiler that can withstand water pressure. Do you still have a pressureless boiler?

Then there is the XP-7 with a water pressure of 1 Bar and a capacity of 7 liters per minute.

Model	XP-7	XP-12
Capacity	7 l/min	12 l/min
Water pressure	1,0 Bar	2,4 Bar
Operating voltage	12 VDC	12 VDC
Power consumption	60 W	120 W
Current	5 A	12 A
Dimensions (lxwxh)	37x26x15 cm	37x26x15 cm
Weight	3,5 kg	3,5 kg
Dry-run protection	yes	yes
Overheat protection	yes	yes
Article code	6020070	6020120

Water Purification System

Sanymo's water purification system converts oxygen into ozone gas. The ozone gas ensures that both the water in the clean water tank and the entire water system always remain free of bacteria and biofilm.

SANYMO₃

WATER PURIFICATION SYSTEM

Sanymo's water purification system converts oxygen into ozone gas. The ozone gas ensures that both the water in the clean water tank and the entire water system always remain free of bacteria and biofilm.

The unstable ozone molecules come into contact with the cell wall of the bacterium creating a oxidative reaction occurs, the cell wall is perforated and the bacteria cannot survive. In the case of viruses, the protein coat is compromised making it impossible for the virus to reproduce, effectively incapacitating the virus.

- ▶ Suitable for clean water tanks up to 200 litres
- ▶ Complete water system always legionella free
- ▶ High-quality housing with touch control
- ▶ Smart timer function
- ▶ Energy efficient

SANYMO AQUASNAP

Introducing our state-of-the-art SANYMO AquaSnap water system building kit, designed with a quick connect feature. Key Features: Efficient: Reduce installation time dramatically, allowing for more flexibility and ease of modification or expansion to the system. Versatile: Our kit includes a range of pipes and connectors, suitable for various water system configurations. Secure and Durable: Our connections are robust and leak-proof, crafted from high-grade material to ensure longevity and optimal performance.

WATER SYSTEM PARTS

ACCUMULATOR TANK

The primary benefit of an accumulator tank is quality of life. It helps produce a much smoother water flow like in your home. It also reduces the amount of cycling the pump does. This means you can even get some water flow at night without the pump kicking on and waking up others in the RV.

In addition, An RV accumulator will increase the overall life of your water pump. It will save battery power and decrease the plumbing system noise.

Hose connection	For 10 mm inner diameter
Volume	0.75 L
Pre-charged pressure	0.7 bar
Max. operating pressure	8.6 bar

WATER FILTER

The filter can be screwed onto the pressure pump with the screw thread. The water pipe can be attached to the fixed hose nozzle.

The clear plastic sight glass makes it easy to see when it is necessary to clean the filter.

The transparent cover can be easily unscrewed and the stainless steel filter mesh can then be removed.

DRAIN TAPS

The SANYMO drain and vent valves. Suitable for venting or draining your boiler or water tank.

The SANYMO drain taps are packed per 2 pieces on a blister pack.

OEM REPLACEMENT PARTS

BOILERTANK

Designed in 2007 and continuously improved. A frost-resistant tank made of high-quality stainless steel. In addition, the HEATEK BT-6 boiler tank has 20% more volume, which is a bonus. The heating element, the water pipe and the outer casing of the defective tank are simply transferred to the new stainless steel tank.

In our factory, all boiler tanks are subjected to extensive quality control, including a leak test under pressure.

- Capacity: 6 liter
- Max. pressure: 3.5 bar
- Stainless steel tank: drinking water safe

HEATING ELEMENT

The high-quality Heatek HE300B heating element for the Truma Therme TT2 and Heatek BT-6 boiler is intended to replace a calcified or defective heating element in the boiler of the caravan or motorhome.

The Heatek HE300B heating element is characterized by high accuracy and excellent price. It is an excellent replacement for the original heating element. The accuracy is higher because the thermostat is located in a hollow tube of the element and measures in the middle of the tank.

- Power: 300W (custom available)
- Temperature: 65 °C
- Overheating protection: 85 °C
- 98/83/EC European drinking water standard

MISCELLANEOUS

FRIDGE COOLING FAN (CF1)

The HEATEK CF1 Fridge Fan provides superior cooling for your caravan or motorhome fridge, even in intense heat. The compact CF1 Cooling Fan, which is both dustproof and watertight, fits perfectly behind your refrigerator and is compatible with all types of absorption refrigerators. It offers easy installation and ease of use with two mounting options, a long power cable and an on/off switch. The CF1 Fridge Fan not only provides effective cooling, but is also quiet and energy efficient, keeping your summer vacation peaceful and comfortable without worrying about the battery.

TV WALL MOUNT (EM1000)

Discover the convenience of the SATENNE EM-1000, the innovative TV bracket for your motorhome or caravan. This lightweight and robust TV mount has an unique 'click' locking system and a handy release cord for the quick use. Enjoy flexible viewing angles thanks to the three pivot points and tilt range. Also available as tablet holder.

This TV mount completes your travel experience!

AUTOMATIC MULTIMETER (AM-1)

Prepare for the holiday with confidence and peace of mind. With the PowerACE AM-1 automatic multimeter, maintaining your caravan or motorhome becomes as easy as a push of a button!

An unexpected malfunction can put a damper on your holiday plans. But don't worry, the PowerACE AM-1 automatic multimeter provides a solution.

This reliable gadget allows you to measure the voltage on your power cables with a simple push of a button. Even detecting a wire break becomes a piece of cake!

POWERACE LITHIUM BATTERIES

PowerAce LiFePO4 smart batteries

The new range of PowerAce (LiFePO4) lithium batteries. These batteries have a low weight compared to an AGM or GEL battery. In addition to a low weight, the batteries have a low energy loss and a short charging time. The life of this battery is more than 3000 cycles. With only 30% discharge, the service life can be up to 8000 cycles.

The operating temperature is between -20 and 60 degrees Celsius. Charge between 0 and 45 degrees Celsius. The battery has an integrated BMS that ensures that the cells are balanced and the consumers are switched off when the battery is empty. The BMS also ensures that the battery is not overcharged.

The PowerAce batteries also switch off slightly earlier than other lithium batteries, which extends the life of the battery. All PowerAce batteries come with a built-in Bluetooth function so that all important information can be easily viewed with an app.

* Available from 100 Ah to 300 Ah

100 AH LITHIUM-ION BATTERY

- BMS and Bluetooth
- Charge voltage: 14.6V
- Max. charge current: 50A
- Discharge current continuous: 100A
- 11.3 kg
- 329*174*220 mm

150 AH LITHIUM-ION BATTERY

- BMS and Bluetooth
- Charge voltage: 14.6V
- Max. charge current: 50A
- Discharge current continuous: 100A
- 14.9 kg
- 483*170*240 mm

200 AH LITHIUM-ION BATTERY

- BMS and Bluetooth
- Charge voltage: 14.6V
- Max. charge current: 50A
- Discharge current continuous: 100A
- 18.2 kg
- 522*240*215 mm
